Overall feedback

Hi Henri,

Thank you for your review. Your feedback was fair and accurate throughout. Your positives highlighted what they did well and balanced out the review between the positives, the score and the improvements section. The improvement suggestions and corrections were spot on in terms of required alterations and how they can be addressed.

Please consider these improvements/suggestions:

□ Be careful of giving too much away. I am specifically talking about using classList. Instead of giving the exact code, you could link them to either the docs or a W3 page that elaborates on it and allows them to attempt to use it on their own.

Solid review here, Henri.

Kind regards,
Layne
