Subject Matter Expertise	100
Code Review and Problem-Solving Guidance	100
Collaboration and Engagement	100
Time and Scope management	100
Establishing Rapport and Boosting Motivation	100
Maintaining a standard structure	100
Overall (using metareview weighting)	**100%**

Hi Henri

Positive aspects of the session:
You conducted the session with professionalism, creating a welcoming and supportive learning environment. You presented the updated housekeeping slides at the beginning, highlighting the team's commitment to supporting students' well-being and safety.

The background image designated for commercial students added a nice touch to the professionalism of the call, thank you for incorporating this.

You provided clear and thoughtful guidance to the student on what documentation needs to be filled out for Task 1 of Level 3, helping them understand the requirements for demonstrating their readiness for the database skills programme.

Great effort sharing your screen and walking through each page with the student, explaining the requirements, this was helpful. The student mentioned finding the session very useful.

Your suggestion for the student to progressively organise their Portfolio of Evidence (PoE) after completing each task was a great idea. This approach will help them stay organised.

You did a great job reviewing each point in the recap slide. Thank you for summarising and clearly explaining the key points covered in the session. This is an excellent approach as it reinforces understanding.

Ending the session by going over the wellness tips was a thoughtful touch. These practical tips are beneficial for the student's productivity and overall well-being.

Improvements to work on:
There are no major improvements to address at this time. The session was conducted in a professional manner, ensuring the student received clear guidance and support that will orient them for the SAQA-accredited database skills programme.

Overall Feedback:
The session was conducted with a welcoming and supportive approach. You presented the updated housekeeping slides and used the designated background image, adding a nice touch of professionalism. Your clear guidance on the documentation requirements for Task 1 of Level 3 was appreciated by the

student, and the session recap reinforced understanding. Ending with the wellness tips also showed your support for the student's well-being and productivity.

Overall, this session was well-executed. Keep up the excellent work Henri!

Kind regards,
Kuvashnee
